

Executive Health Analytics Report

Hospital Performance Analytics Dashboard

2023 Operational & Financial Insights

(Data-Driven Executive Report)

Business Snapshot (What's happening overall?)

Hospital group shows **stable revenue but operational leakage**

- Revenue: **551.25K (Strong baseline)**
- Patients: **50 (Limited but high value base)**
- Doctors: **10 (Balanced workforce)**
- Insurance Coverage: **100% (Fully insured model)**

Key takeaway:

Business is financially stable but depends heavily on efficiency improvements.

Core Performance Insight

Revenue is concentrated, not evenly distributed

- Central Hospital drives majority revenue
- Other two branches lag behind but remain stable
- Revenue depends on few high-value services

Insight:

Growth is coming from **concentration, not diversification**

Branch Performance Breakdown

Revenue imbalance across hospitals

- Central Hospital → **229K (Leader)**
- Eastside Clinic → **162K**
- Westside Clinic → **160K**

Insight:

Central Hospital is acting as a **financial anchor**, while others are supporting units.

What is actually generating money?

Revenue is driven by **high-tech treatments**

Top contributors:

- Chemotherapy → **129K**
- MRI → **116K**
- X-Ray → **111K**

✦ Insight:

Hospital is **diagnostic + oncology dependent**, not general care driven.

Revenue Behavior Over Time

Revenue is **not stable, it is cyclical**

- Peak: April (**64.3K**)
- Strong Q2 performance
- Drop after Q2
- Lowest: December (**27.6K**)

✦ Insight:

Clear **seasonality pattern** → **demand fluctuation issue**

Patient Structure Insight

Patient base is **gender-skewed**

- Female: **65%**
- Male: **35%**

✦ Insight:

Hospital demand is **female-driven**, especially in specific departments.

Operational Efficiency Problem

Appointments show a major leakage issue

- Completed: **23% only**
- No-show: **26%**
- Cancelled: **25.5%**
- Scheduled: **25.5%**

 Insight:

Almost **half of system capacity is not converting into completed care**

 This is the biggest operational issue in the system

Doctors & Departments Insight

Workload and revenue are **unevenly distributed**

Departments:

- Pediatrics → highest volume
- Dermatology → highest cost per patient
- Oncology → specialized low volume, high value

Doctors:

Top 3 doctors generate majority revenue

 Insight:

Performance is **highly top-heavy**

Final Business Insights & Actions

Key Findings:

- Revenue is stable but concentrated
- High dependency on Central Hospital
- Appointment leakage is critical issue
- Few doctors generate majority revenue
- Seasonal demand fluctuations exist

Recommendations:

- Fix no-show problem (reminders + follow-ups)
- Balance doctor workload
- Increase Q3–Q4 patient acquisition
- Expand mid-revenue departments
- Reduce dependency on few high performers
